

Ahmad Abuabdou

Lead UX/UI Designer | Product Designer

Gaza, Palestine | +970-598-787-121 | ahmad.a.k.abuabdou@gmail.com
|---|[Behance](#)

Professional Summary

Lead UX/UI Designer and Product Designer with 6+ years of experience transforming complex workflows into intuitive, story-driven digital products. Proven track record architecting scalable multi-platform design systems, leading end-to-end product design from discovery to launch, and integrating AI-assisted creative tools. Combines a rigorous Computer Systems Engineering background with empathetic human-centered design to bridge design vision and front-end execution.

Core Competencies

- **Product & UX Design:** Product Strategy, Information Architecture, Wireframing, Interactive Prototyping, Design Systems Architecture, Micro-interactions, Responsive Web & Mobile Design (iOS/Android), Accessibility (WCAG).
- **UX Research & Validation:** User Interviews, Usability Testing, Persona Modeling, User Journey Mapping, Competitor Analysis, Heuristic Evaluation.
- **Tools & Technologies:** Figma, Adobe XD, Photoshop, Illustrator, Design Tokens, HTML5, CSS3, Tailwind CSS, React (Foundational), GitHub Pages.

Professional Experience

Lead UX/UI Designer | Open Screenplay

April 2021 – Present | Remote

- Architect and lead the end-to-end UX/UI ecosystem and scalable design system for the Open Screenplay platform, standardizing UI patterns and component libraries across web applications.
- Redesigned the core real-time collaborative scriptwriting editor to optimize creative flow, reduce cognitive overload, and streamline multi-writer co-authoring workflows.
- Led UX/UI design and micro-interaction patterns for the integration of Rawi, an AI writing companion, establishing intuitive inline prompts, contextual sidebars, and assistive feedback loops.
- Designed the showcase portal and talent incubator experience for the **M Film Lab** program, expanding access, applications, and representation for underrepresented global storytellers.

- Partnered closely with engineering, product managers, and executive leadership to ensure 100% design fidelity and rapid front-end implementation using modern component frameworks.

Sole UX/UI Designer | APEX for IT Solutions (The Digital Lab)

December 2020 – April 2021 | Gaza, Palestine

- Served as the agency's dedicated UX/UI designer, leading end-to-end product design for diverse client web and mobile applications across the MENA region from initial brief to production release.
- Designed **Udenz** (UAE), a comprehensive dental healthcare mobile application connecting patients with verified clinics, featuring friction-free search, provider discovery, and instant appointment booking.
- Architected the user experience and subscription ordering workflow for **Fitafe'** (Ramallah), an e-commerce platform offering customized healthy meal plans.
- Designed **Alsada Tribe** (Qatar), a mobile community application centered on tribal heritage preservation, charitable initiative coordination, and community announcements.
- Created reusable UI kits and interactive prototypes to accelerate client sign-offs and streamline developer handoff.

Product & UX/UI Designer | Freelance / Contract

December 2018 – December 2020 | Remote

- Provided end-to-end product design, wireframing, and high-fidelity prototyping for international and regional clients across diverse industries.
- Designed a dual-system **Election Campaign** management platform (July 2020), including a cross-platform mobile logging application for field delegates and a real-time analytics control panel displaying live vote counts, candidate performance, and demographic breakdowns.
- Conducted stakeholder interviews, competitive benchmarking, and usability tests to validate features and improve conversion rates prior to development.

Education

Bachelor of Science in Computer Systems Engineering (BSc CSE)

Al-Azhar University of Gaza | Graduated 2018

- Integrated computer engineering, algorithms, and software architecture with human-computer interaction (HCI), providing a technical foundation that enables seamless developer collaboration.
