SUMMARY

UX/UI designer with 7+ years of experience taking products from research and wireframes to shipped, production-ready interfaces. For five years I have led end-to-end design at Open Screenplay, a screenwriting platform with an AI writing companion, Rawi — from the design system and script editor to the marketing and motion work around them. Computer-engineering background, so I prototype in code and work closely with founders and engineers. Collaborating with international teams from Gaza.

EXPERIENCE

Lead UX/UI Designer · Open Screenplay Apr 2021 – Present

- Grew a single redesign engagement into a multi-year role owning the platform's entire UX/UI ecosystem.
- Led the move to a unified, light-first design system (brand tokens and components) shared by the product, marketing pages and contest campaigns; refined the core script editor to protect writers' creative flow.
- Design **Rawi**, the AI writing companion: inline suggestion micro-interactions (use / try again / discard), a PDF-import flow with progress and safe cancel, and a deterministic "Story Map" component that replaced model-triggered next-step suggestions — avoiding extra credit costs and unwanted AI agency.
- Launched the **M Film Lab** showcase and multi-step, eligibility-gated application flow (mfimlab.com), for a program opening film pathways to underrepresented filmmakers.
- Direct creative for marketing: brand animation, a Reel ad campaign, contest assets and a 24-genre poster system, produced with AI image/video tools (Seedance, Veo, ElevenLabs) alongside Figma and Figma Make.
- Partner directly with the CEO and engineers on product decisions, weighing UX, cost and user trust.

UX/UI Designer · Apex for IT Solutions Dec 2020 – Apr 2021

- Sole designer across all web and mobile platforms, leading design end to end — brief to launch — for a range of client projects, including The Digital Lab.

Freelance UX/UI Designer · Independent Dec 2018 – Dec 2020

- Built a client base from a first project in Ramallah to international work in the UAE and Qatar, delivering web and mobile UX/UI from research through hand-off (see Selected Work).

SELECTED WORK

- **Open Screenplay** — screenwriting platform: design system, script editor, Rawi AI companion. openscreenplay.com
- **M Film Lab** — showcase site and application flow for underrepresented filmmakers (Adobe XD, 2022). mfimlab.com
- **Election Campaign** — delegates log votes in a mobile app while a control panel shows live results and candidate/voter statistics (2020). [Behance](https://behance.net)
- **Udenz** — dental platform connecting patients and dentists across the UAE; mobile app UI. [Behance](https://behance.net)
- **Fitafe'** — hand-crafted healthy meal plans, tailored to goals; web UX/UI for a first client in Ramallah. [Behance](https://behance.net)
- **Alsada Tribe** — community and charity mobile app for a Qatari tribe.

SKILLS

UX & Product	User research, personas and journeys, information architecture, wireframing, rapid prototyping, interaction design, usability testing, competitor analysis, conversion flows
UI & Systems	Design systems, component libraries, responsive web and mobile UI, bilingual Arabic–English (RTL) interfaces
Tools	Figma, Figma Make, Adobe XD, Photoshop, Illustrator, HTML / CSS / JavaScript
AI & Motion	Prompt-driven creative direction; AI image and video pipelines with Seedance, Google Flow / Veo and ElevenLabs

EDUCATION & LANGUAGES

B.Sc. in CSE — Al-Azhar University of Gaza, 2018

Languages — Arabic (native), English (professional)
